

Please reject NAB's petition 04-160. I support Satellite's Radio and its ability to report Traffic and Weather. I just got a new car with XM Radio in it, and one of the main reasons for wanting Satellite Radio was the Traffic and Weather reports for Chicago. I frequently go to Chicago from my home in Michigan, and WBBM's traffic reports leave much to desire. They give it so fast that it's hard to understand the reports. And I was born and raised in Chicago proper. On the other hand, XM Radio reporting speed is easy to understand, and gives more information to the issues on each expressway. Please don't stop this kind of information from being broadcasted. I PAY to listen to this kind of programming. Thank You.
